Part of Castlegate James Australasia

Also available GMO Free

Canola Meal is a high quality protein source with excellent levels of by-pass proteins. Inclusion of Canola Meal in supplementary feed diets is widely used as part of TMR blends.

DESCRIPTION:

Canola meal is the by-product of the extraction of oil from Canola. It is a protein-rich ingredient that is widely used to feed all classes of livestock. Worldwide production of Canola meal is second only to soybean meal

Canola meal is often included in the diets of several species of livestock because of its high protein content. It is often fed as a substitute for soybean meal. Canola meal protein is poorer in lysine than soybean but is richer in sulphur-containing amino acids

Economically competitive

Canola meal is an economically competitive source of protein. It requires no additional processing.

FEEDING RATES:

Please consult with your local J&S Technical Feed Advisor or your nutritional advisor about recommended feed rates. We suggest you ensure proper transition over an extended period and offer access to quality fibre. We also strongly encourage you to ensure fresh water access at all times.

AVAILABILITY:

J&S Canola meal is available on a long term and regular basis for customers wishing to secure an ongoing supply. Clients can choose to purchase Canola meal on a spot basis subject to availability or enter a contract ensuring guaranteed supply.

WHY USE JAMES & SON:

Localised knowledge, progressive manufacturing methodologies and an integrated nationwide delivery network ensure reliable uninterrupted supply of premium quality stockfeed solutions throughout the entire year.

ADDITIONAL NOTES:

This information should be used as a general guide only. Please ask your J&S Technical Feed advisor about a diet check or consult with your nutritional advisor to determine the appropriate needs for your animals.

This product does not contain restricted animal material. And is safe for lactating animals.
