Part of  Castlegate James Australasia

Corn Dried Distillers Grain is a high energy, mid protein feed. Inclusion of Corn Dried Distillers Grain in supplementary feed diets is widely used as part of TMR blends.

#### DESCRIPTION:

Corn Dried Distillers Grain is the by-product of ethanol production.

High in fibre, but well digested by ruminants. A high-energy, mid-protein feed which is reasonably undegradable in the rumen. It is low in starch.

As will all distillers by-products the residual cereal oil is unsaturated. It should be accounted for in TMR's if other ingredients in the ration has unsaturated oils present.

#### Economically competitive

Corn Dried Distillers Grain is an economically competitive source of protein. It requires no additional processing.

#### FEEDING RATES:

Please consult with your local J&S Technical Feed Advisor or your nutritional advisor about recommended feed rates. We suggest you ensure proper transition over an extended period and offer access to quality fibre. We also strongly encourage you to ensure fresh water access at all times.

#### AVAILABILITY:

J&S Corn Dried Distillers Grain is available on a long term and regular basis for customers wishing to secure an ongoing supply. Clients can choose to purchase Corn Dried Distillers Grain on a spot basis subject to availability or enter a contract ensuring guaranteed supply.

#### WHY USE JAMES & SON:

Localised knowledge, progressive manufacturing methodologies and an integrated nationwide delivery network ensure reliable uninterrupted supply of premium quality stockfeed solutions throughout the entire year.

#### ADDITIONAL NOTES:

This information should be used as a general guide only. Please ask your J&S Technical Feed advisor about a diet check or consult with your nutritional advisor to determine the appropriate needs for your animals.

This product does not contain restricted animal material. And is safe for lactating animals.
