Part of  Castlegate James Australasia

Cotton Seed Meal is a quality protein source with excellent levels of by-pass proteins and also good in energy. Inclusion of Cotton Seed Meal in supplementary feed diets is widely used as part of TMR blends.

#### DESCRIPTION:

Cotton Seed Meal is a by-product of oil manufacture obtained by pressing of seeds which fibres have been removed. The seed is still high in fibre and oil.

A high protein feed with excellent digestible fibre and good energy levels.

In comparison to Soya Bean Meal, Cotton Seed Meal is higher in fibre and has a lower amino acid profile. (Low in lysine, methionine, and cystine).

#### Economically competitive

Cotton Seed Meal is an economically competitive source of protein. It requires no additional processing.

#### FEEDING RATES:

Please consult with your local J&S Technical Feed Advisor or your nutritional advisor about recommended feed rates. We suggest you ensure proper transition over an extended period and offer access to quality fibre. We also strongly encourage you to ensure fresh water access at all times.

#### AVAILABILITY:

J&S Cotton Seed Meal is available on a long term and regular basis for customers wishing to secure an ongoing supply. Clients can choose to purchase Cotton Seed Meal on a spot basis subject to availability or enter a contract ensuring guaranteed supply.

#### WHY USE JAMES & SON:

Localised knowledge, progressive manufacturing methodologies and an integrated nationwide delivery network ensure reliable uninterrupted supply of premium quality stockfeed solutions throughout the entire year.

#### ADDITIONAL NOTES:

This information should be used as a general guide only. Please ask your J&S Technical Feed advisor about a diet check or consult with your nutritional advisor to determine the appropriate needs for your animals.

This product does not contain restricted animal material. And is safe for lactating animals.
