J&S Brewers Yeast is an excellent protein and energy liquid feed.

#### DESCRIPTION:

Brewer's yeast is not new to the dairy feed industry. Past studies have shown inclusion of brewer's yeast to the TMR has lowered dry matter intake and at the same time increased milk production, therefore the efficiency of milk production was improved. (Norwood TMR-BLY trial, Mar 87).

Along with the energy content of the product the amino acids and trace mineral balances of brewer's yeast have also been considered extremely beneficial to dairy animals.

#### FEEDING GUIDE:

There is one possible issue with using brewer's yeast and that is to limit the amount that you give the cows because anything more than 800g (6.25 kg wet) per cow per day could result in grades.

Our advice is to start with half of that amount and build it to the 800g maximum over the first week.

The problem comes when clients see the response from using yeast, they all make the mistake of trying to feed more and more and that is when you will pick up problems with sensory readings.

#### FEEDING RATES:

Please consult with your local J&S Technical Feed Advisor or your nutritional advisor about recommended feed rates. We suggest you ensure proper transition over an extended period and offer access to quality fibre. We also strongly encourage you to ensure fresh water access at all times.

#### AVAILABILITY:

J&S Brewers Yeast is available on a long term and regular basis for customers wishing to secure an ongoing supply. Clients can choose to purchase Brewers Yeast on a spot basis subject to availability or enter a contract ensuring guaranteed supply.

#### WHY USE JAMES & SON:

Localised knowledge, progressive manufacturing methodologies and an integrated nationwide delivery network ensure reliable uninterrupted supply of premium quality stockfeed solutions throughout the entire year.

#### ADDITIONAL NOTES:

This information should be used as a general guide only. Please ask your J&S Technical Feed advisor about a diet check or consult with your nutritional advisor to determine the appropriate needs for your animals.

This product does not contain restricted animal material. And is safe for lactating animals.
