Part of Castlegate James Australasia

Our specially formulated James & Son Multi (AMP) Pellet is a high energy, good protein level pellet widely used in dairy, beef, pig and poultry rations as well as supplementary feeding.

BENEFITS:

Unique energy source blend

Starch, sugar and fat content provide a safe feed with a reduced chance of acidosis, without sacrificing live weight gain or milk production.

Sweet palatable taste

Encourages dry matter intake crucial to increasing milk production and live weight gain.

High Neutral Detergent Fibre Content

Reduces acidosis and improves animal health when compared with traditional pellets.

Improved utilisation

Steam conditioning of the multi pellets helps to gelatinise the starch content, therefore improving digestion and efficiency.

Tailored design

J&S Multi (AMP) Pellets are tailored to complement grass, hay or good quality silage/balage.

Economically competitive

J&S Multi Pellet is an economically competitive source of energy and protein and requires no additional processing.

FEEDING RATES:

Please consult with your local J&S Technical Feed Advisor or your nutritional advisor about recommended feed rates. We suggest you ensure proper transition over an extended period and offer access to quality fibre. We also strongly encourage you to ensure fresh water access at all times.

AVAILABILITY:

Localised knowledge, progressive manufacturing methodologies and an integrated nationwide delivery network ensure reliable uninterrupted supply of premium quality stockfeed solutions throughout the entire year.

ADDITIONAL NOTES:

This information should be used as a general guide only. Please ask your J&S Technical Feed advisor about a diet check or consult with your nutritional advisor to determine the appropriate needs for your animals.

This product does not contain restricted animal material. And is safe for lactating animals.
