Part of Castlegate James Australasia

Save time and money by not purchasing other products and using valuable labour units to administer or dust the required minerals your animal needs for optimal health and performance.

#### BENEFITS:

##### Minerals with feed value!

Palatability is key that makes the Triple X Pellet range one of the most cost effective ways of getting Magnesium, Lime, Salt and Zinc into the girls without the hassle. The added bonus is you haven't dropped your feed ME value to get the minerals you require.

##### Improved utilisation

By using J&S Cookie Crumble and J&S Broll in the pellet it provides the rumen bugs with the source of energy and starch required for them to process the protein from grass and other forages into forms of protein which are useable by the cow/goat for milk production and growth.

Ideally suited for inclusion in Total Mixed Rations (TMR's) for dairy, beef, sheep and goat productions systems. See technical data sheet for inclusion rates of total diet.

##### Economically competitive

Save labour units as well as farm equipment costs and maintenance. No adding minerals to the water, this can restrict water intake for the animal and can affect milk production.

#### FEEDING RATES:

Please consult with your local J&S Technical Feed Advisor or your nutritional advisor about recommended feed rates. We suggest you ensure proper transition over an extended period and offer access to quality fibre. We also strongly encourage you to ensure fresh water access at all times.

#### AVAILABILITY:

J&S Triple X is available on a long term and regular basis for customers wishing to secure an ongoing supply. Due to high palatability and the possibility of high intake levels, J&S Triple X is not sold on its own. Must be used as part of a tailored ration.

#### WHY USE JAMES & SON:

Localised knowledge, progressive manufacturing methodologies and an integrated nationwide delivery network ensure reliable uninterrupted supply of premium quality stockfeed solutions throughout the entire year.

#### ADDITIONAL NOTES:

This information should be used as a general guide only. Please ask your J&S Technical Feed advisor about a diet check or consult with your nutritional advisor to determine the appropriate needs for your animals.

This product does not contain restricted animal material. And is safe for lactating animals.
